LUMIN

QUICKSTART GUIDE

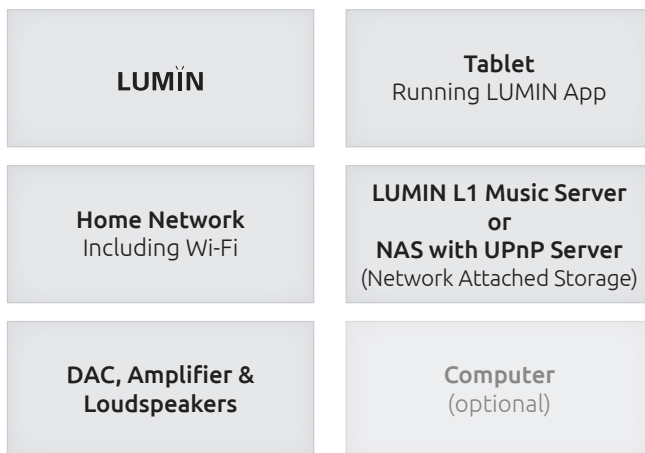

U1

a

WHAT YOU NEED

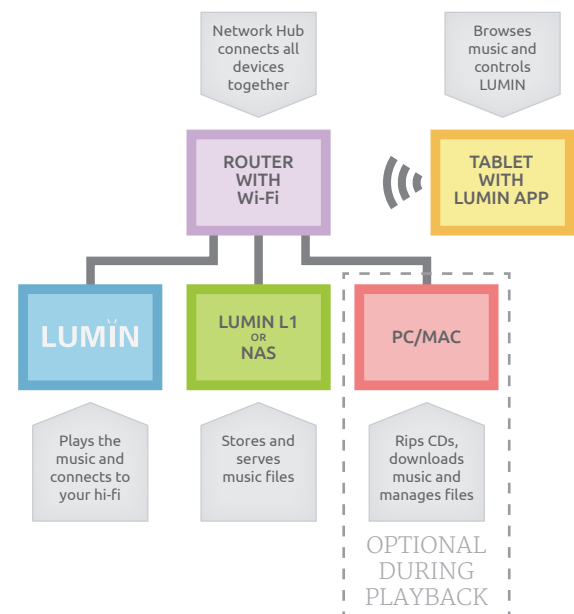

Typical LUMIN U1 system components:

b

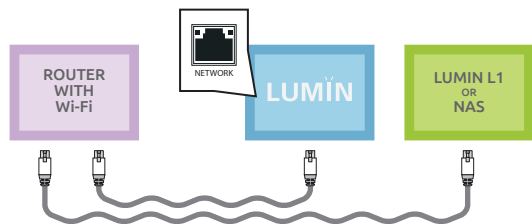

NETWORK SETUP

A typical LUMIN network in use:

1

Connect LUMIN and the NAS to your network using Ethernet cables.

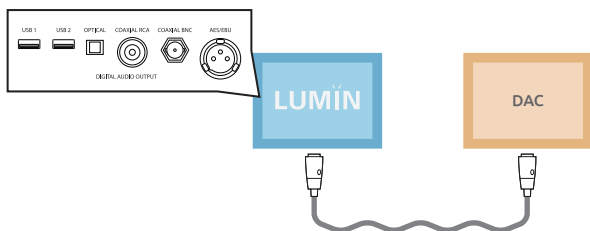

2

Make sure your iPad is connected wirelessly to the same network.

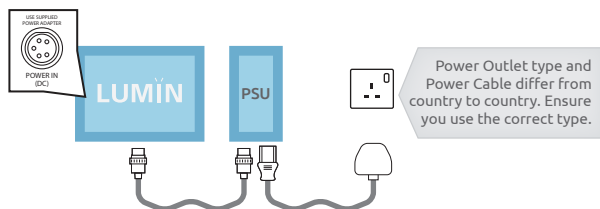

3

Connect LUMIN to your DAC using your preferred audio connectors.

4

Connect the LUMIN Power Supply to LUMIN and your Power Outlet.

5

Turn on all devices.

6

Ensure there are some music files on LUMIN L1, your music server, or NAS (often called 'Music').

7

If using a NAS, make sure the UPnP Media Server is started. (See NAS manufacturer website for info.)

Media Server

Enable UPnP Media Server

Apply

8

Start the LUMIN App and it will **automatically** detect your UPnP Media Server and your LUMIN Audiophile Network Music Player.

If you have multiple servers or multiple LUMIN units, you can select these in the App 'Settings' menu.

Your music selection will now display in the main LUMIN App browse window where you can select music to play and create playlists.
